

THE FX-MOTION Z1 CAMERA STABILIZING RIG

SLED/UPPER JUNCTION BOX

Side to side sled with integrated connectivity. Fitted with Focus, Auxiliary, Video and Camera connectors. Focus motor rods attached to camera plate. Support bracket for wireless video transmission.

YOU CREATE, WE CONSOLIDATE

Fx-motion® is proud to present you the "Z1". Our top of the range center post offers professional operators both cutting edge technology and ultimate convenience. The "Z1" benefits from a number of unique features such as a reversible gimbal for low-mode operation and our quick lock system.

POST

Both standard and extended posts available. High quality Fisher connectors and spiral cable link sled up with junction box.

GIMBAL

Removable gimbal can be used on both standard and extended posts. Quick lock makes adjusting the rig easy: no Allen Keys required! Rubber grip allows for added convenience. As a unique feature, the gimbal can be removed and reversed for low-mode operation!

LOWER JUNCTION BOX:

"Z1" is compatible with both PAG and Anton Bauer batteries. All power lines are fused. Battery compartment slides on rods and offers counter weight allowing for different monitors to be used.

HAND LUGGAGE PACKAGE

The "Z1" is a portable, light-weight design that will fit in your hand luggage and is easy to set up, with no tools needed.

ABOUT FX-MOTION

Developing better tools for today's filmmakers.
